

What is a Watershed? & Our Impacts on the Lake

Wed., January 31, 2018 | 6:30-8:30PM

Chip Holt Nature Center in Vitale Park, Livonia, NY 14487
Free and open to the public!

Watershed Education Center Open House - 5:30-6:30PM

Check out the new Education Center! It is located in Vitale Park - next door to the Chip Holt Nature Center.

Limited seating. Pre-registration recommended. Call the Livingston County Dept. of Health, Center for Environmental Health at 585-243-7280 to reserve a spot!

SPEAKERS:

- **Dr. Willard Harman, CLM, Professor of Biology, SUNY Oneonta Distinguished Service Professor & Director of Biological Field Station**

Dr. Harman will define a watershed and discuss how land use and cover impact lakes like ours and how nutrient flows lead to excessive and unwanted plant growth. He will also share numerous best management practices that all of us can put into practice.

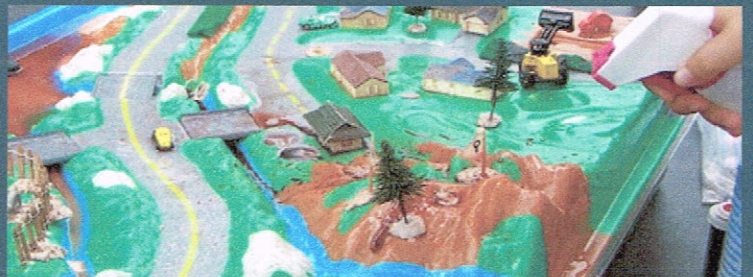

- **Heather Ferrero, Deputy Director, Livingston County Planning Department**

Conesus Lake Watershed Management

- **Emily Staychock, Watershed Educator, Cornell Cooperative Extension, Yates Cty.**

The Impact & Mitigation of Non-point Source Pollution in a Watershed

Emily will also use a watershed model to demonstrate how human impact causes runoff pollution and erosion.

Sponsored by the Conesus Lake Watershed Council, Conesus Lake Association, Livingston County Environmental Management Council & Dept. of Health, and Cornell Cooperative Extension of Livingston County.
